

Tim Parlett

Co-founder & CTO, Zopa - The first lending and borrowing exchange

Tim is a visionary and experienced IT practitioner with a broad base in the technology sector, with experience ranging from corporate finance to IT operations.

Tim has a track record of significant innovation combined with hands-on delivery. He was prime-mover behind the creation of the first P2P lending and borrowing exchange (Zopa), JPMorgan's group eCommerce strategy and the proposed merger of the IT departments of Ireland's two largest banks. He has also led the implementation of several large wholesale banking systems and has advised at Board and investor level on a wide variety of strategic business issues in the IT sector.

In May 2004 Tim Co-founded Zopa and is a member of the UK and US Zopa management teams.

Tim is Chief Technology Officer responsible for design, development and delivery of all aspects of IT supporting all of Zopa's activities, covering all Zopa territories.

Tim is also currently involved with London Technology Partners a specialist advisory firm focused on technology infrastructure. Its clients are technology companies, venture capital firms, and IT departments of major corporations.

Tim was responsible for launching the Egg CRM technology at Egg.com, the countries first on-line bank. He then moved into a strategic consulting role for Egg Marketing.

A visionary leader, Tim speaks about the creation of customer focused, technology- driven corporations.
